All of the lamps listed have been thoroughly tested & are approved for smooth flicker free dimming with our ZGRIDLED dimmer. The Gold, Silver & Bronze rating refers to the dimming range restricted by the lamps power supply.

Gold = Approved for smooth, silent, flicker free dimming & fantastic dimming range with lamps lumen potential unaffected\*

Silver = Approved for smooth, silent, flicker free dimming & fantastic dimming range with lamps lumen potential barely affected\*

Bronze = Approved for smooth, silent, flicker free dimming & fantastic dimming range with lamps lumen potential slightly affected\*

\*Please note these results are for compatibility with the ZGRIDLED. Standard dimmers are likely to produce poor & erratic results with many LED lamps.
